

CAMARO 2013-UP NAVIAGTION INSTALLATION MANUAL

Always disconnect battery before starting working

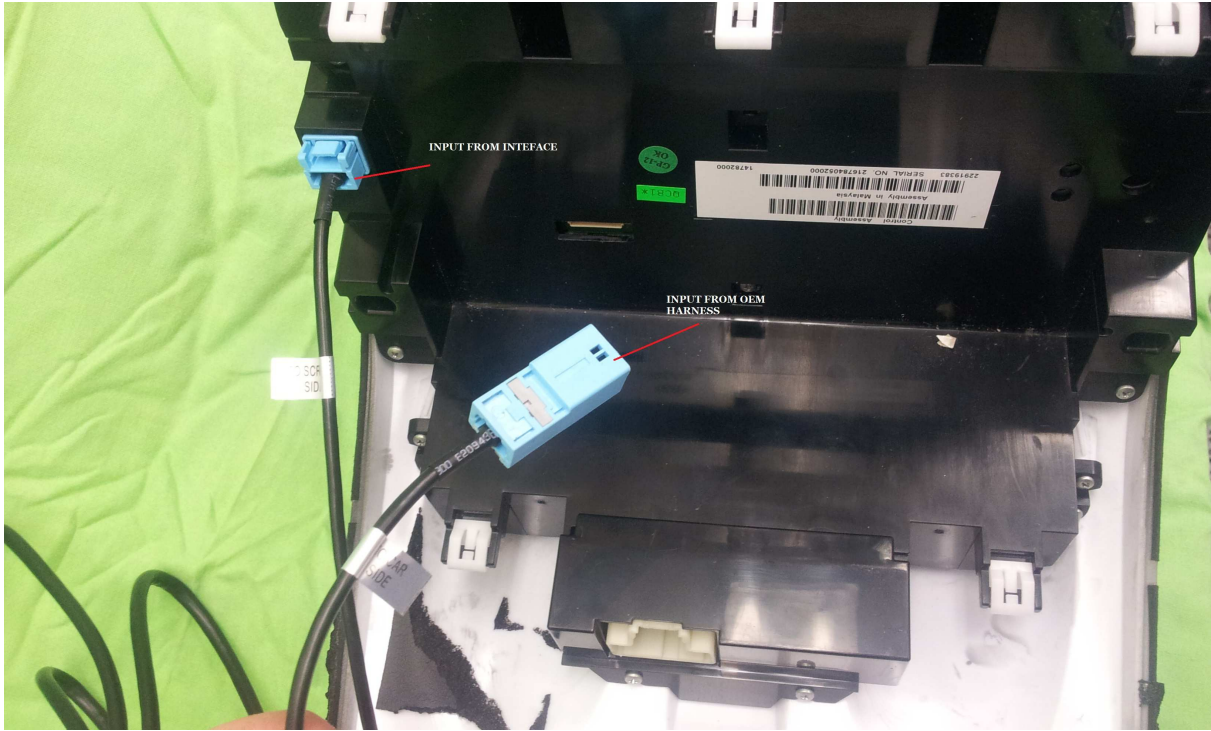

Picture shows a fully connected Camaro unit

Yellow +12v and Black (Ground) cable DONT need to be connected.

Only Red +12v acc cable need to be connected .

Once connected place the small silver box into all the included bags and place it as near the firewall as possible.

Before turning the ignition on eject the sd card from the gps box.

Turn the car on and switch to navigation mode, a + will appear, press it till it says OK and press OK.

Now insert the sd card and follow the manual
